PROJECTS

DEEPPAKE DETECTION ON SOCIAL MEDIA.

- To develop a robust and efficient system for detecting machine-generated tweets (deep fakes) on social media using deep learning techniques and Fast-Text embeddings.
- The system aims to differentiate between human-generated and machine-generated tweets, providing a tool for social media platforms to flag and manage potentially deceptive content.
- Develop a web application, identify and mitigate the spread of misleading and deceptive content, thereby maintaining the integrity and trustworthiness of information shared online.

PORTFOLIO

- A portfolio featuring a range of projects that highlight my skills and expertise in web development. It includes dynamic, responsive applications built with the latest technologies.
- Technologies Used REACTJS, Javascript, Html and Css tools.
